

# TASCA S2.01 Nocions bàsiques SQL

## Nivell 1

### - Exercici 1

A partir dels documents adjunts (estructura\_dades i dades\_introduir), importa les dues taules. Mostra les característiques principals de l'esquema creat i explica les diferents taules i variables que existeixen. Assegura't d'incloure un diagrama que il·lustri la relació entre les diferents taules i variables.

La taula transaction conté els dades de les compres que se fan en la nostra empresa, els valors que proporciona són: el id (ID de la Transacció), credit\_card\_id (ID de la tarjeta utilitzada), company\_id (ID que associa a la taula company on estan els dades de la companyia), user\_id, lat, longitud, timestamp (Dia/Hora que se fa la transacció), amount (El valor de la compra), declined (Info de si es accepta o no).

```
3 • SELECT * FROM transaction;
```

```
4
```

### Exercici 2

Necessitem optimitzar l'assignació dels recursos i dependrà de la capacitat operativa que es requereixi, per la qual cosa et demanen la informació sobre la quantitat de transaccions que realitzen les empreses, però el departament de recursos humans és exigent i vol un llistat de les empreses on especifiquis si tenen més de 4 transaccions o menys.
